DESCRIPTION

3 Bed MVHR Kit

WHY CHOSE AN ENVIROVENT MVHR KIT

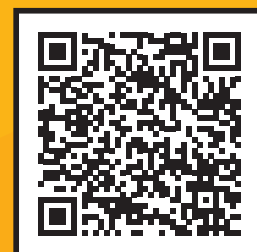

This is the most complete kit on the market and includes everything that is required to install a full MVHR system including condensate piping, screws, cable ties and duct sealant.

All equipment has been carefully selected to ensure achieving compliance is as easy as possible for the customer. This includes using 90mm Fast Track ducting to reduce resistance, thermal mass flow ducting to ensure there is no condensation build up in the system, acoustic flexible ducting to reduce noise and much more.

EnviroVent Kit	Competitor Kit	Benefit
MVHR Unit + 4 Controls	MVHR Unit + 1 Control	Multiple controllers included for multiple wet rooms
Thermal Mass Flow Ducting	Rigid PVC Ducting	Helps achieve compliance for installations in cold areas
90mm Semi-Rigid Ducting	75mm Semi-Rigid Ducting	Larger diameter - helps achieve the correct airflows outlined in Approved document F
Insulation Sleeves for Semi-Rigid Ducting	X	Helps achieve compliance for installations in cold areas
Acoustic Flexible Ducting for Final Connections to Diffusers	X	Helps keep noise levels to a minimum in habitable rooms
Condensate Pipe	X	One stop shop – no need to go elsewhere as everything is included
Ancillary Equipment (Screws, Sealant, Galvanised Banding, Aluminium Tape)	X	One stop shop – no need to go elsewhere as everything is included

For a full breakdown of the MVHR kit or if you require more information, please get in contact with your local ASM

- Suitable for properties up to 130m²
- EnviroVent take no responsibility for the installed MVHR system performance or compliance with regulations.
- All MVHR units are supplied with right hand configuration.
- All equipment is non-returnable.
- This kit is not suitable for properties above 4.5m from ground floor level.
