

ENVIRONMENTAL POLICY

Our Business

EnviroVent is a UK manufacturer and supplier of energy efficient and sustainable ventilation products to control condensation and eliminate mould problems in the home. Our award winning ventilation products create all year round healthy, fresh and ideal indoor environments. Back in 1987, we began our mission to rid homes of the damaging and debilitating effects of poor indoor air, condensation and mould. With over 150,000 condensation problems solved to date we feel as though we can call ourselves experts when it comes to advising on indoor air quality and condensation in UK homes. Our passion for providing good indoor air quality is strong now as it was when we first started out. Our philosophy is to provide an outstanding service through the design, manufacture, expert installation and after service of our sustainable ventilation products and systems for the long term.

EnviroVent's mission is to make environmental sustainability intrinsic to the business and its activities.

Our Impacts

We are committed to reducing the negative environmental impacts of our own activities, in particular those relating to:

- ✓ Our office, production and distribution: energy use and waste
- ✓ Our business travel / commuting: Vehicle selection & maintenance, fuel and CO2 emissions
- ✓ Our products: Materials used, energy use, packaging and waste
- ✓ Our Installations: energy, waste and travel
- ✓ The goods and services we choose: packaging, materials, paper etc.

Our commitments

We are committed to understanding, improving and communicating our environmental system as and engaging all employee in this process. Our key areas for reducing impacts are:

- ✓ Comply with relevant environmental legislation
- ✓ Where practical and achievable improve and maintain our environmental performance and management systems
- ✓ Strive to reduce the environmental impact of its products by innovative design to reduce waste and improve efficiency
- ✓ Reducing waste and increasing recycling where possible. IE paper, cardboard, plastics, wood and metal etc.
- ✓ Prevent waste generated at head office, and distribution centre going to landfill through employing of a ZERO to landfill waste management company
- ✓ Reducing energy use within our office, production and distribution centre

- Reducing CO2 emissions and fuel usage through journey planning and encouraging low-carbon travel modes, e.g. walking, cycling, journey sharing, traveling by public transport and train where practical
- Reducing CO2 emissions and fuel usage of our commercial fleet through on board telematics allowing driver performance to be recorded, reviewed and improved
- Looking at environmental and ethical considerations when choosing suppliers and services for our business operations

We are committed to working with our Board, senior management, staff and suppliers to ensure we understand and communicate the environmental impacts of our activities.

This policy is reviewed on an annual basis and updated as necessary.

The Company's environmental policy is authorised by the Managing Director who will ensure that the Company complies with its requirements so far as is practical. He will ensure that employees are competent to undertake their jobs and are aware of the environmental impact of their actions or omissions.

Andy Makin

Managing Director
