SILENT MV

Ultra Quiet In-Line Duct Fans

SILENT MV

Ultra Quiet In-Line Duct Fans

5
YEAR

IP44
RATED

About

Ultra quiet and low profile helicocentrifugal in-line fans suitable for a wide range of domestic and commercial applications. Fitted with sound absorbent insulation and manufactured with an adjustable two speed 230V 50Hz motor*.

Easy to install and maintain, the SILENT MV fans guarantee exceptional performance with significant noise reduction.

***Except for the SILENT MV 160/100, which is fitted with a patented silent axial motor.**

- Sound absorbent insulation
- 360° rotating connection box
- Sealed for life ball bearings
- Fitted with a 2/3 speed motors
- 5 year warranty
- IP44 rated
- Incredibly silent running
- High performance
- Significant energy savings
- Complies with building regulations
- Flexible location
- Easy maintenance

PRESENTING THE WORLD'S QUIETEST IN-LINE FANS

Presenting the world's quietest in-line fan range in their class, the SILENT MV range creates a quantum leap forward in technology to improve the acoustic performance of up to 12 dB(A) compared with similar products on the market.

The SILENT MV range is the result of an intense R&D, technological and economic investment to ensure that you can be guaranteed of a product range that provides exceptional performance

with significant noise reduction. Following extensive aerodynamic testing, we have been able to not only reduce the amount of noise produced, but also ensure that the noise level that is actually emitted is at a far lower frequency, providing a quiet and ambient environment.

By installing the SILENT MV, you will never experience the disturbance of noisy ventilation again.

Versatility

The SILENT MV range offers one of the most versatile fan systems on the market. Due to its flexibility it can be used in a multitude of small to medium fan installations.

Especially advantageous in applications where the system may be running for long periods throughout the day, the acoustic benefits of the SILENT MV fans ensure that optimum comfort is achieved without the disturbance of noisy ventilation systems.

Innovative Engineering

The SILENT MV has been designed with state of the art technology to achieve results to satisfy the most demanding specifier. The low profile and compact design of the helicocentrifugal fans enable them to be installed where space is restricted, such as false ceilings.

Unique Design

The unique perforated design of the casing directs sound waves into the high density sound absorbent material to prevent air leakage and minimise noise.

Rotating Connection Box

The connection box can be rotated 360° to enable the power cable to be easily connected.

Flexible Rubber Gaskets

Duct connections are constructed out of flexible rubber gaskets, which minimise sound and vibrations to the ducts.

Wall

Ceiling

How does it work?

Sound waves produced inside the SILENT MV are directed through the perforated inner cover and absorbed by the layer of sound absorbent material.

Ease of Maintenance

The central body of the SILENT MV can be easily dismantled from the connections to enable rapid maintenance, without the need to interfere with the ducting.

The SILMV1300/250 and SILMV2000/315 are in-line mixed flow fans with a low profile to meet ventilation needs in commercial and industrial applications, especially where sound may be a problem. Constructed from sheet steel with epoxy polyester paint, acoustic insulation [M0] glass fibre, within an outer shell. External terminal box IP55. Removable fan body with 3 speed motor, single phase 230V-50/60Hz speed controllable, IP44, Class F, external rota aluminium motor with capacitor and thermal protection.

These fans retain the same philosophy as the rest of the SILENT MV range; to improve comfort whilst achieving a substantial reduction in radiated noise level, without sacrificing airflow performance and ease of installation.

Support Bracket

Suitable for wall or ceiling mounting, fixing brackets to the motor body are included.

Low Noise Level

- ① Aerodynamic inlet to improve airflow and reduce sound
- ② Attenuating perforated skin

Electrical Accessories

Various speed controllers available. Please contact EnviroVent for further details.

⚠ Timer models are commissioned at installation to operate at high speed. Auxiliary two speed switches or variable speed controllers can be used with standard models.

Also available in Ecowatt versions. Low energy DC motor with trickle and boost facility. Please contact us for details.
